

# AVOIDING RED HERRINGS:

Technology Support that Works

**Dr. Gary L. Ackerman**

Rivendell Academy, Digital Project Leader  
Mount Wachusett Community College, Instructional Designer

# OVERVIEW

- The Story of the Story
- UTAUT
- Planning Cycle
- Reflexive Curriculum Design
- Curriculum Repository
- What's Next?

# THE STORY OF THE STORY

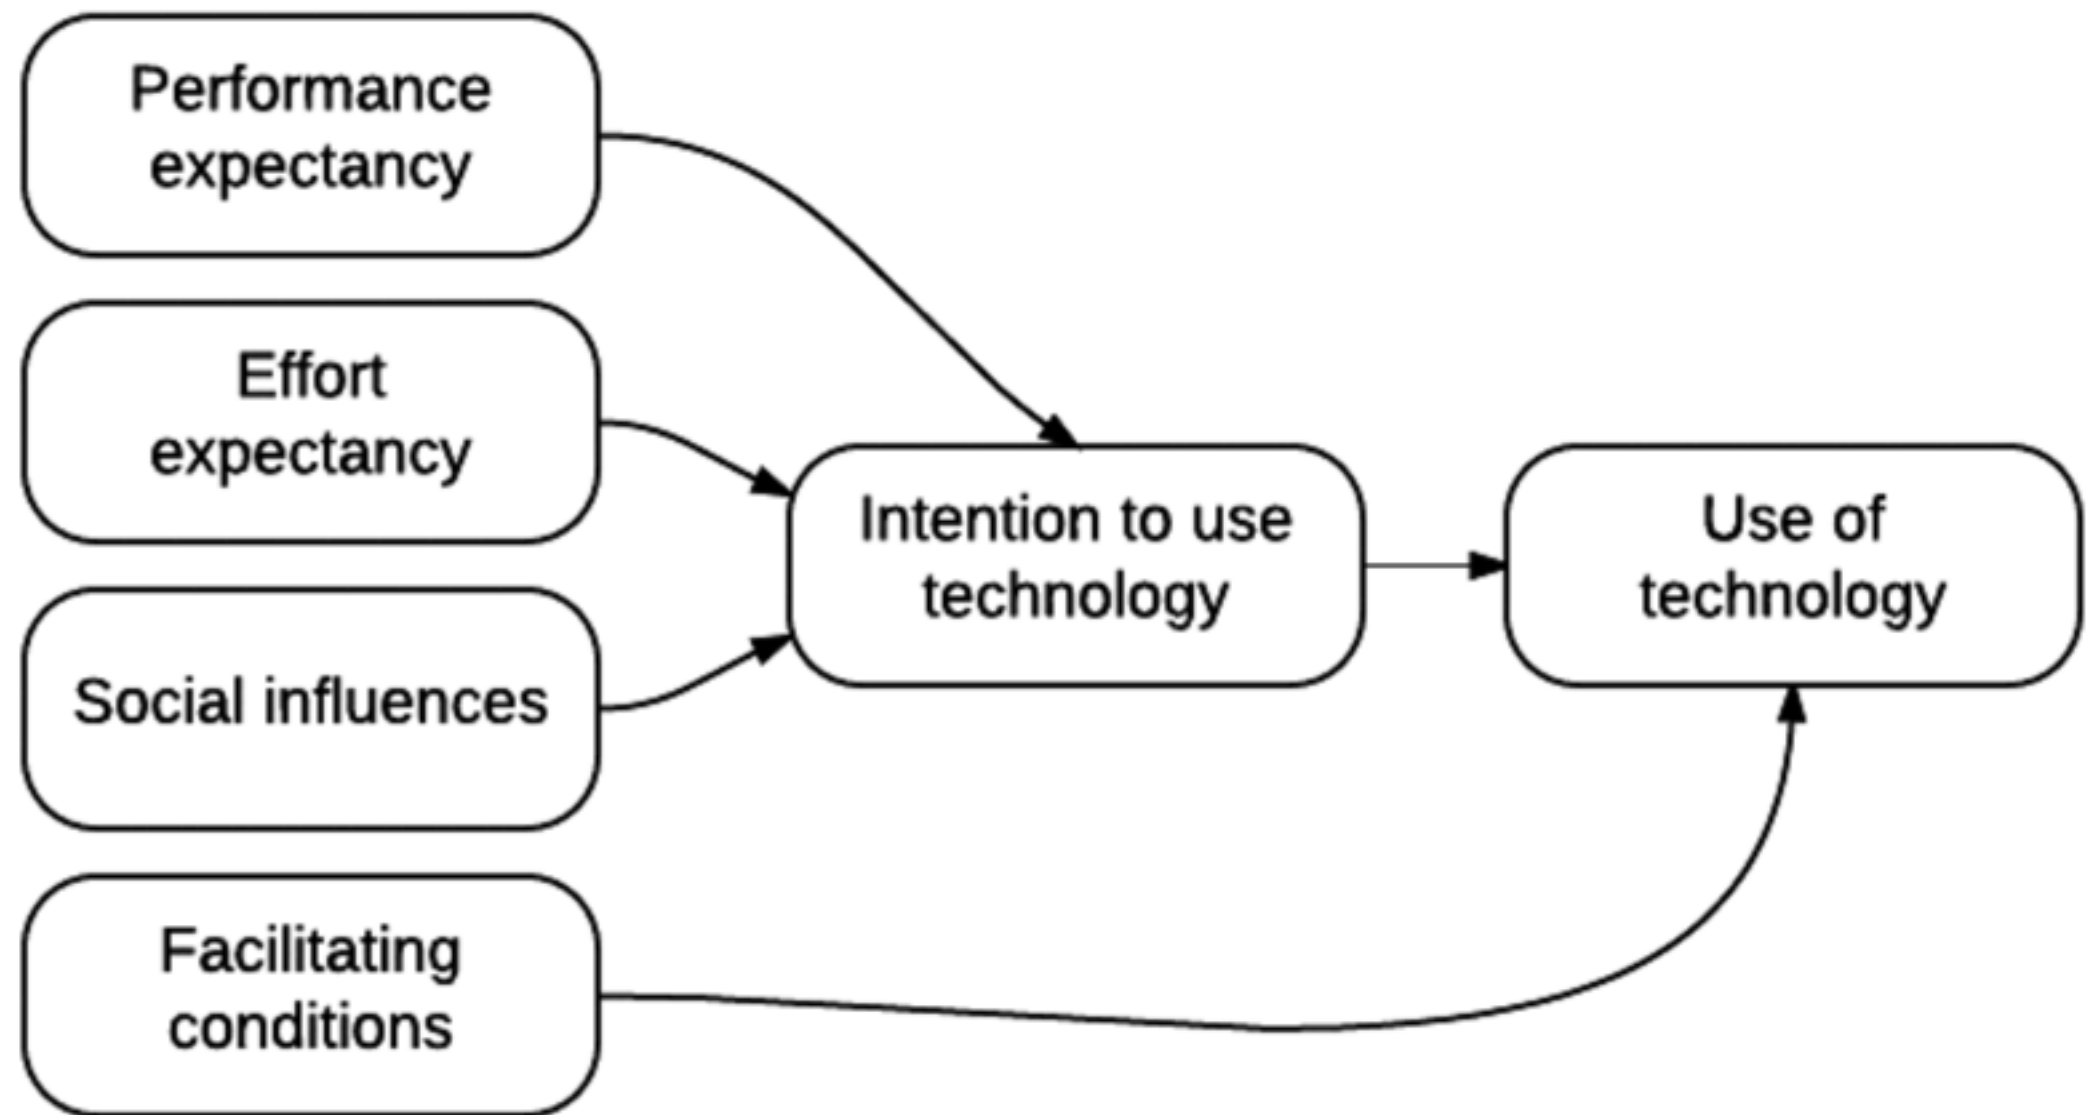

- Obtain & maintain
- Train
- Teaching & learning

- Public schools in rural New England
- Design/ action research
- “Improve the use of educational technology

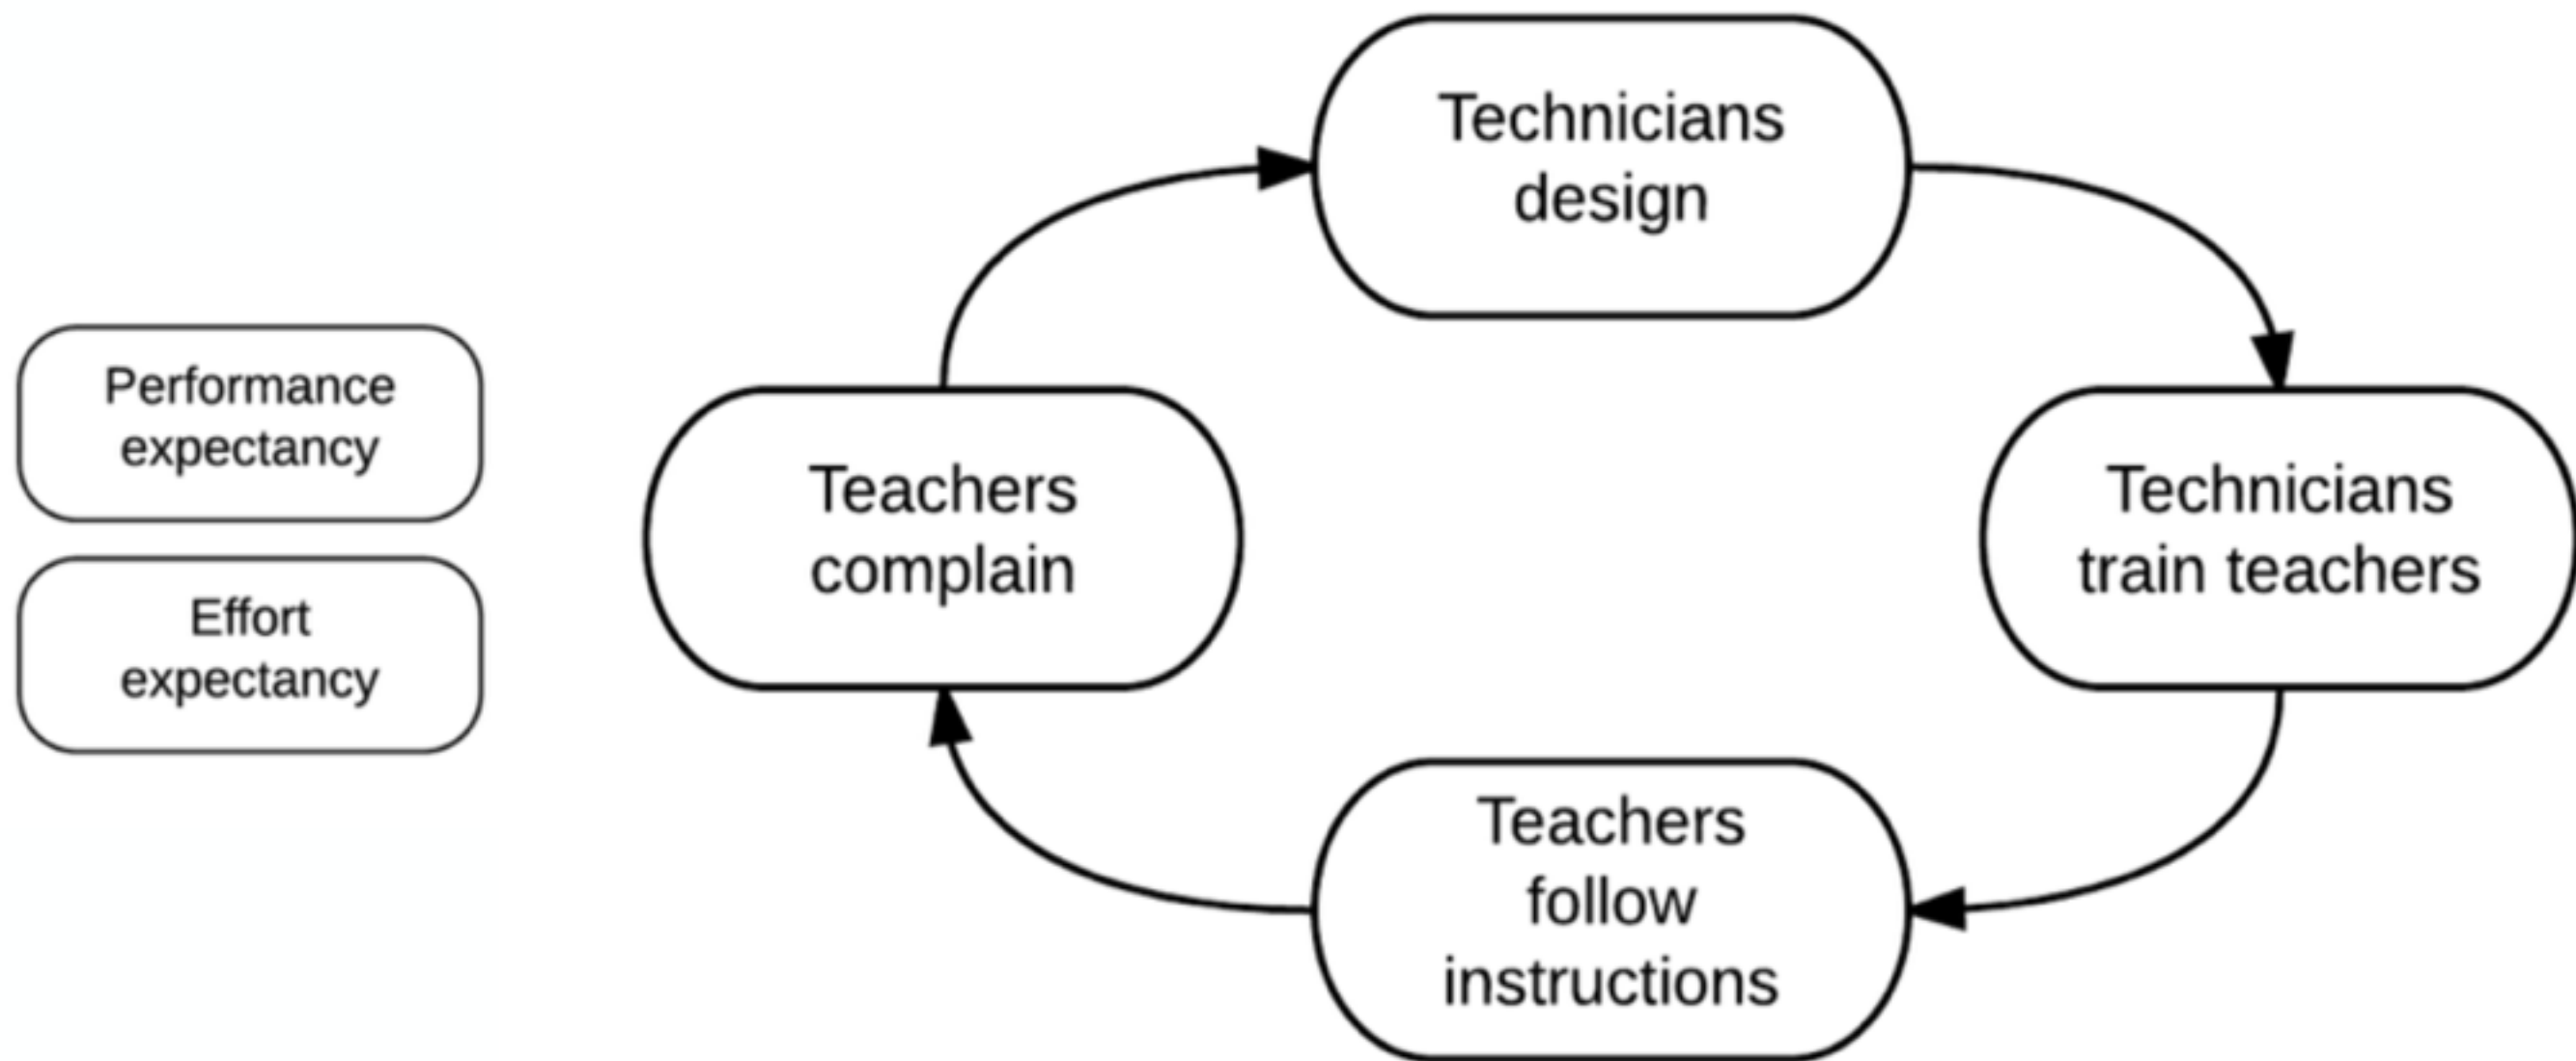

Red herrings in the  
practitioner literature

# UNITED THEORY OF ACCEPTANCE AND USE OF TECHNOLOGY

Venkatesh, V., Morris, M. G., Davis, G. B., & Davis, F. D. (2003). User acceptance of information technology: Toward a unified view. *MIS Quarterly*, 27(3), 425–478.

# PLANNING CYCLE

- **Gerry's SIS Story**
- **Donna's Logging-on Story**

# PLANNING CYCLE: LESSONS LEARNED

- 1) Technology focus to user focus
- 2) “Competence” for educators
- 3) Perpetual planning

# REFLEXIVE CURRICULUM DESIGN

Design lessons that cannot be done without technology

# REFLEXIVE CURRICULUM DESIGN: LESSONS LEARNED

- 1) Usefulness is irreversible and quantum
- 2) Teachers advocate for useful technology

- “My student’s get best-fit lines”
- “Every student had a works cited page”

# CURRICULUM REPOSITORY

# CURRICULUM REPOSITORY: LESSONS LEARNED

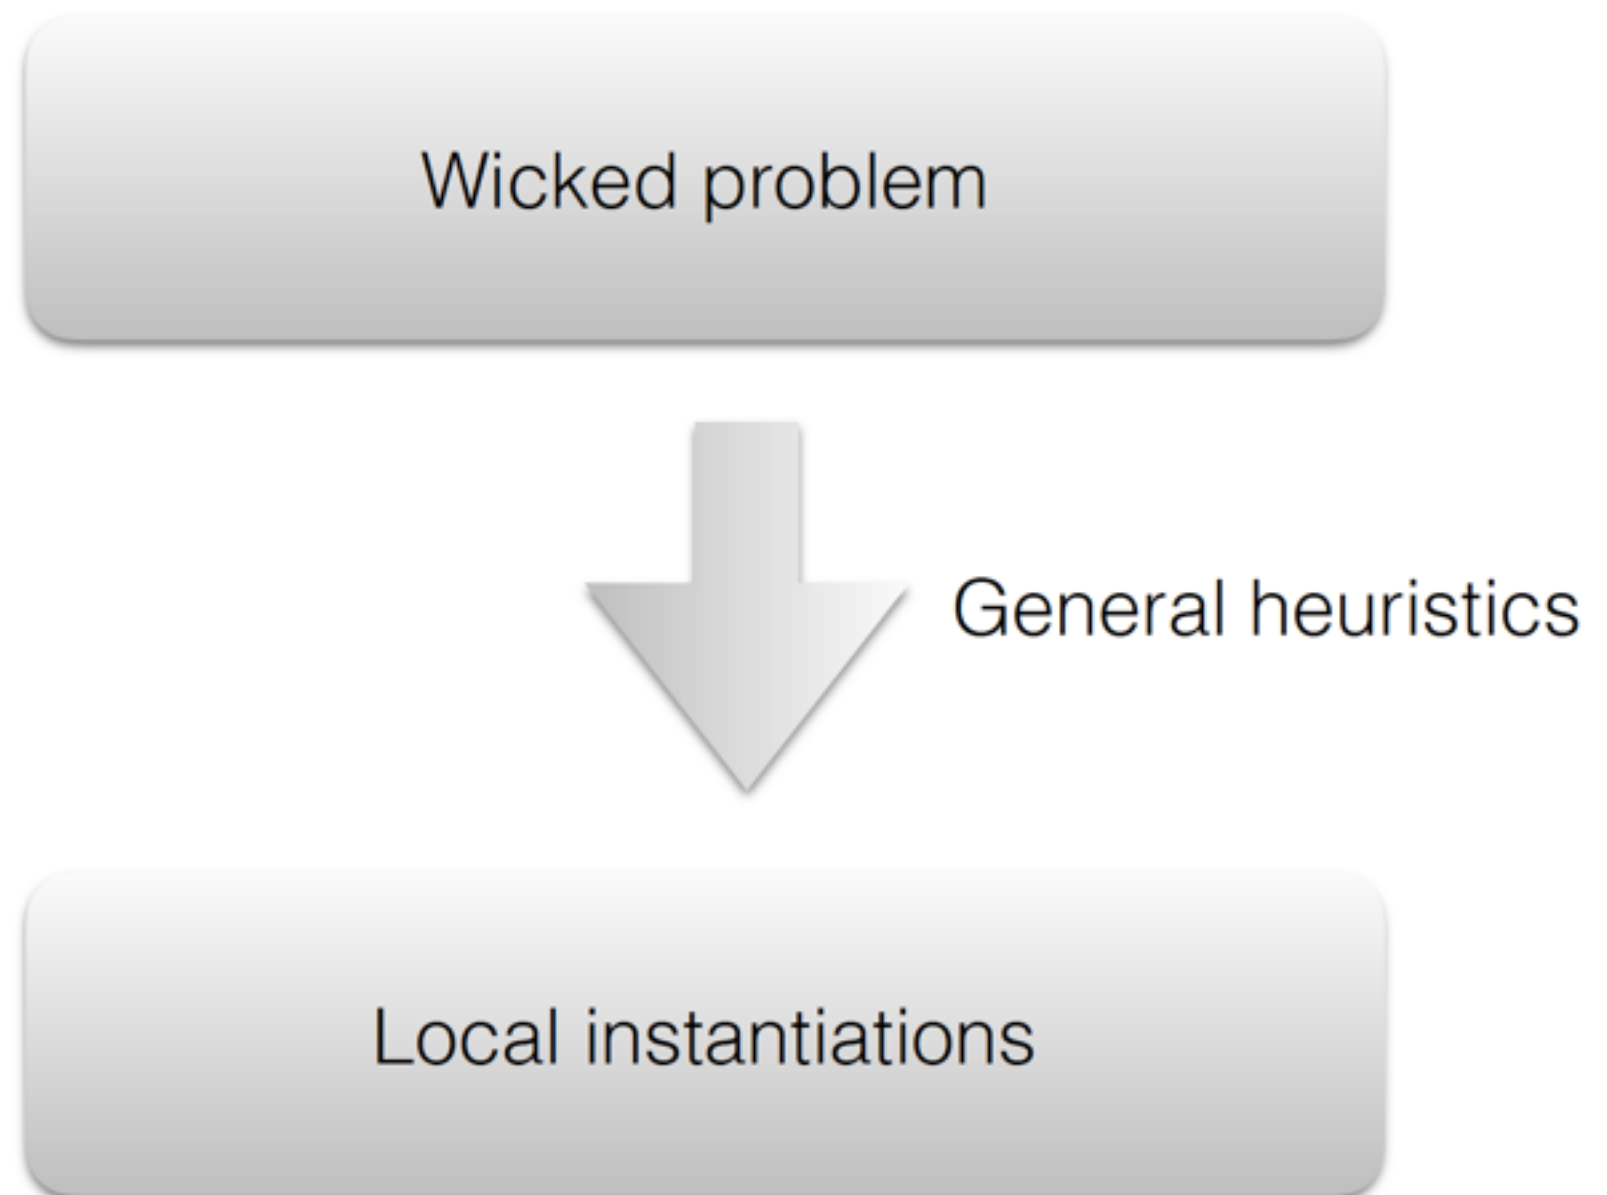

- 1) Ease of use affects usefulness
- 2) Social influences are organic
- 3) Contributors - Lurkers - One and done

Pam (the teacher-leader):

- Started using the LMS
- Got the new hire set up
- Generated enthusiasm
- Mrs. C's teachers did not

# WHAT WE SEEM TO KNOW I

How to solve wicked problems

# WHAT WE SEEM TO KNOW 2

Understanding of constructs depends on context...  
context more variable in education than in business

“For me”

“For for math”

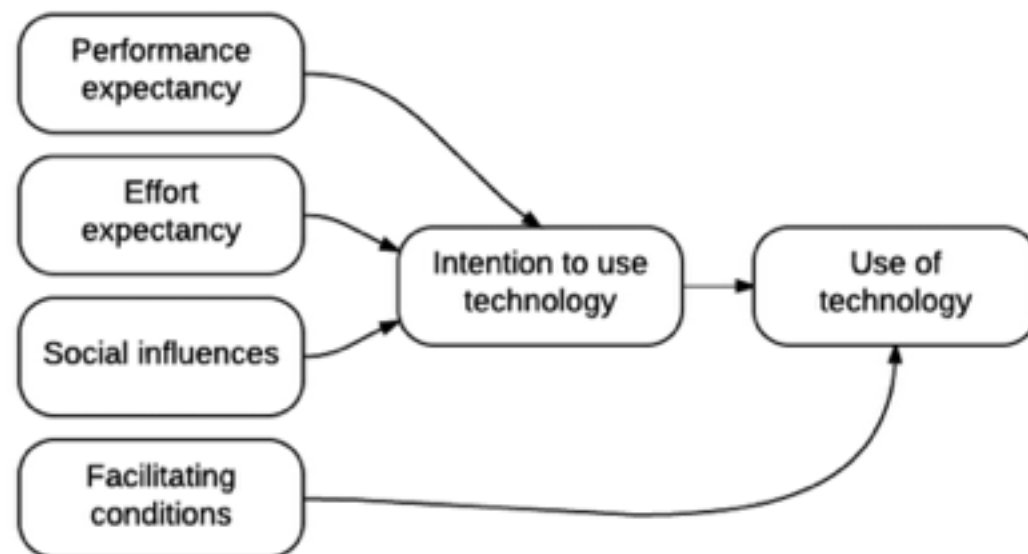

“For my students”

“For for language arts”

# WHAT WE SEEM TO NOT KNOW I

How conceptual artifacts vary within communities

“Expertiness”  
of educators  
and technicians

How do we capture/ negotiate differences?

How do we (continuously) observe expectancies?

# WHAT WE SEEM TO NOW KNOW 2

Is autonomy relevant in education populations?

**“I may not know technology, but I know easy and useful.”**

- Teacher who serves on technology committee

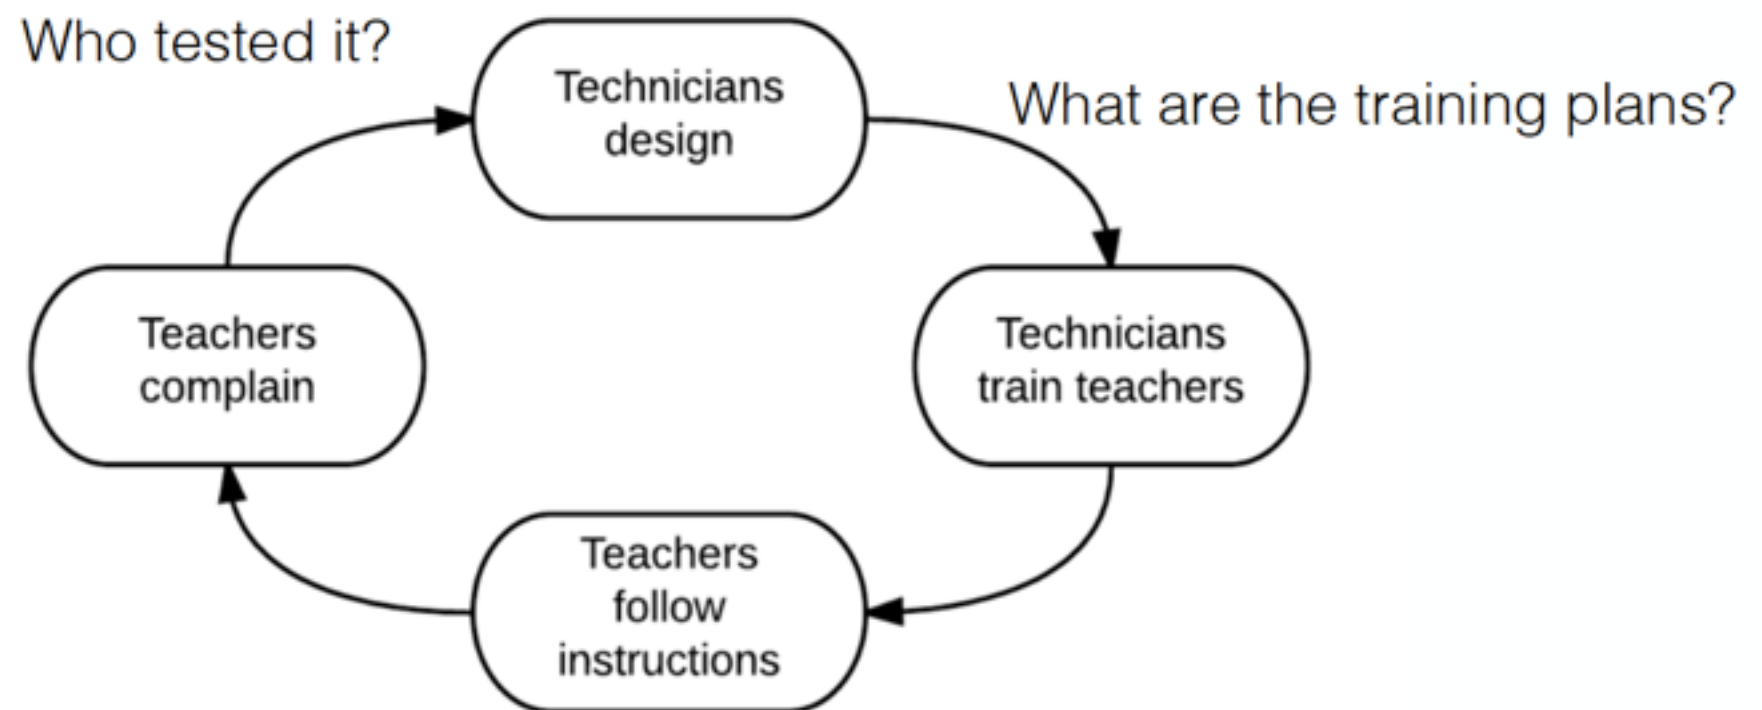

# WHAT WE SEEM TO NOT KNOW 3

Is leadership a facilitating condition?

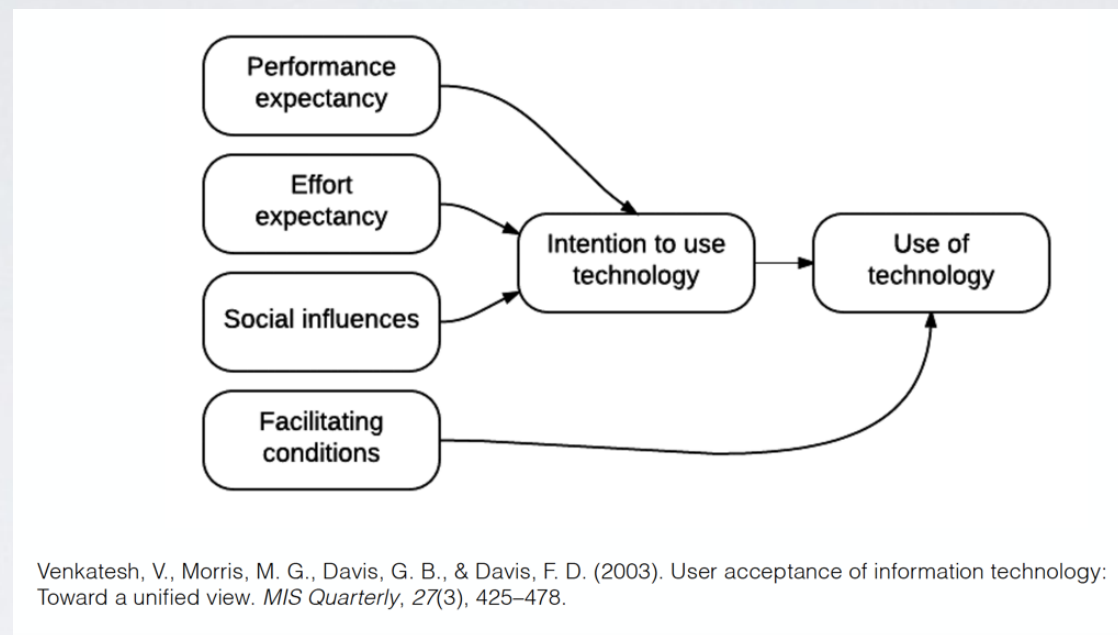

**“I can ask questions that inform my decision-making.”**

- Principal reflecting on the planning cycle

Are you doing it the way you are supposed to?

# CONCLUSIONS:

- UTAUT predict and explains
- UTAUT is effective planning heuristic
- UTAUT needs refined/ localized definitions
